## EDUCATION

### Constantine the Philosopher University in Nitra,

Applied Computer Science

2017 – 2021

Nitra, Slovak Republic

The university taught me the foundations of **software development**, problem solving, algorithms, and critical thinking, while giving me **hands-on experience** in programming, architecture and IT systems.

## MAIN TECH STACK

PHP 8 years

Laravel 8 years

Symfony 1 year

TypeScript 5 years

Node.js 1 year

## LANGUAGES

Slovak Czech

English German

Russian Spanish

**Senior Backend Developer with 8+ years of experience building scalable, production-ready web applications.** Specialized in **PHP (Laravel)** with experience in **Symfony**, focused on designing robust backend systems, clean APIs and high-performance applications.

- Built fintech, crypto and e-commerce platforms used by **tens of thousands of users**
- Strong focus on **backend architecture, performance, scalability and maintainability**
- Experienced with **REST APIs, third-party integrations (payments, auth, booking systems)**
- Hands-on with **MySQL, server infrastructure, CI/CD and deployments**
- Basic experience with **Node.js** and fullstack collaboration (Blade/React/Next.js/Vue.js)

## WORK EXPERIENCE

### PHP Developer, Direct Accounting s.r.o.

10/2025 – 03/2026 | Prague, Czech Republic

- Maintained and optimized large-scale PHP accounting system (**40k+ users**)
- Refactored legacy codebase to improve **performance, stability and maintainability**
- Worked with modern PHP practices and partially **Symfony-based architecture**
- Improved system reliability and handled **data consistency and performance bottlenecks**

### Full-stack Web Developer, CRYPTON DIGITAL, SE

03/2018 – 10/2025 | Nitra, Slovak Republic

- Lead backend developer for platforms used by **30k+ users** using **PHP (Laravel), MySQL and REST APIs**
- Designed scalable backend systems for **fintech, e-commerce and booking platforms**
- Implemented **auth, payments, reservations and business logic**
- Optimized performance using **query optimization, indexing and caching**
- Built reliable systems handling **transactions, data consistency and edge cases**
- Integrated **third-party services (payments, external APIs)**
- Used **Node.js** for specific services and integrations
- Managed **AWS infrastructure, deployments and CI/CD pipelines**

### Mobile Developer, WEXO EUROPE s.r.o.

02/2019 – 10/2025 | Prague, Czech Republic

- Developed features for crypto-finance app (**50k+ users**) with strong backend integration
- Implemented **transactions, wallets, staking and KYC flows**
- Collaborated on API design and backend communication
- Used **Node.js** for auxiliary services and integrations

## INTERESTS & HOBBIES

Travel

## Full-stack Web Developer, Freelance

06/2017 – 03/2018 | Nitra, Slovak Republic

- Built web applications using **PHP (Laravel), MySQL and JavaScript**
- Designed backend logic, CMS systems and database structures
- Delivered fullstack solutions for small businesses

## PROJECTS

---

### **Ambrosa** , *E-commerce/E-shop*

2025 – 2026

- Backend system with **CMS, auth, payments and order management**
- Implemented full **checkout and payment flow**
- Laravel / MySQL / AWS

### **Szamos Apartments** , *Booking Platform*

2025 – 2025

- Developed **booking/reservation system with availability logic**
- Backend for reservations, pricing and CMS
- Integrated with React frontend

### **WEXO App** , *Fintech Mobile App*

2019 – 2025

- 50k+ users, custom UI & dashboard
- Auth, wallets, crypto features
- Android → Flutter transition

### **MAAD Slovakia** , *E-commerce/E-shop*

2024 – 2025

- Backend for **auth, cart, checkout and payments**
- CMS and product management system
- Laravel / MySQL

### **MyAsteria** , *Fintech portfolio*

2025 – 2025

- Backend system with **business logic and API endpoints**
- Data processing and CMS

### **Wexopay** , *Business portfolio*

2022 – 2025

- Laravel backend with **API layer, dashboard and CMS**
- Later separated into frontend (React) + backend system

### **Amantius Apartments** , *Investment/Booking platform*

2023 – 2024

- Backend for **reservations, dashboard and user management**
- Booking and investment logic

### **OnlyVans** , *Booking platform*

2022 – 2022

- Backend for **reservation system, auth and user dashboard**
- Availability and booking logic

### **Crypton Digital** , *Business portfolio*

2018 – 2021

- Backend-driven platform with CMS and dashboard
- Laravel / MySQL
